

Mobile

The business-only mobile network
with first class customer service

Disrupting the mobile business market together.

Gamma Mobile is a service built exclusively for the UK business market. With over twenty years' experience in B2B communications, we understand what our customers need, both with their mobile product and with the service and support that underpins it.

Gamma Mobile has been tailored specifically for UK businesses and is designed to deliver improved coverage for voice and data via your device. Gamma Mobile empowers, not hinders, conducting business while on the move.

We also understand that the business market is never static, so we've designed tariffs that flex dependent on your usage, delivering value every month for the entirety of your contract.

What makes us different?

The benefits of Gamma Mobile

When it comes to the UK business mobile market, we're confident we've got the right recipe for success.

Enhanced Voice

- Voice over 4G (VoLTE)
Make and receive calls and texts over the 4G network. This gives you superior call quality and improved coverage and connectivity.
- Voice over WiFi (VoWiFi)
Make and receive calls and texts over WiFi networks without the need for additional applications.

Direct access to the core systems within the mobile network

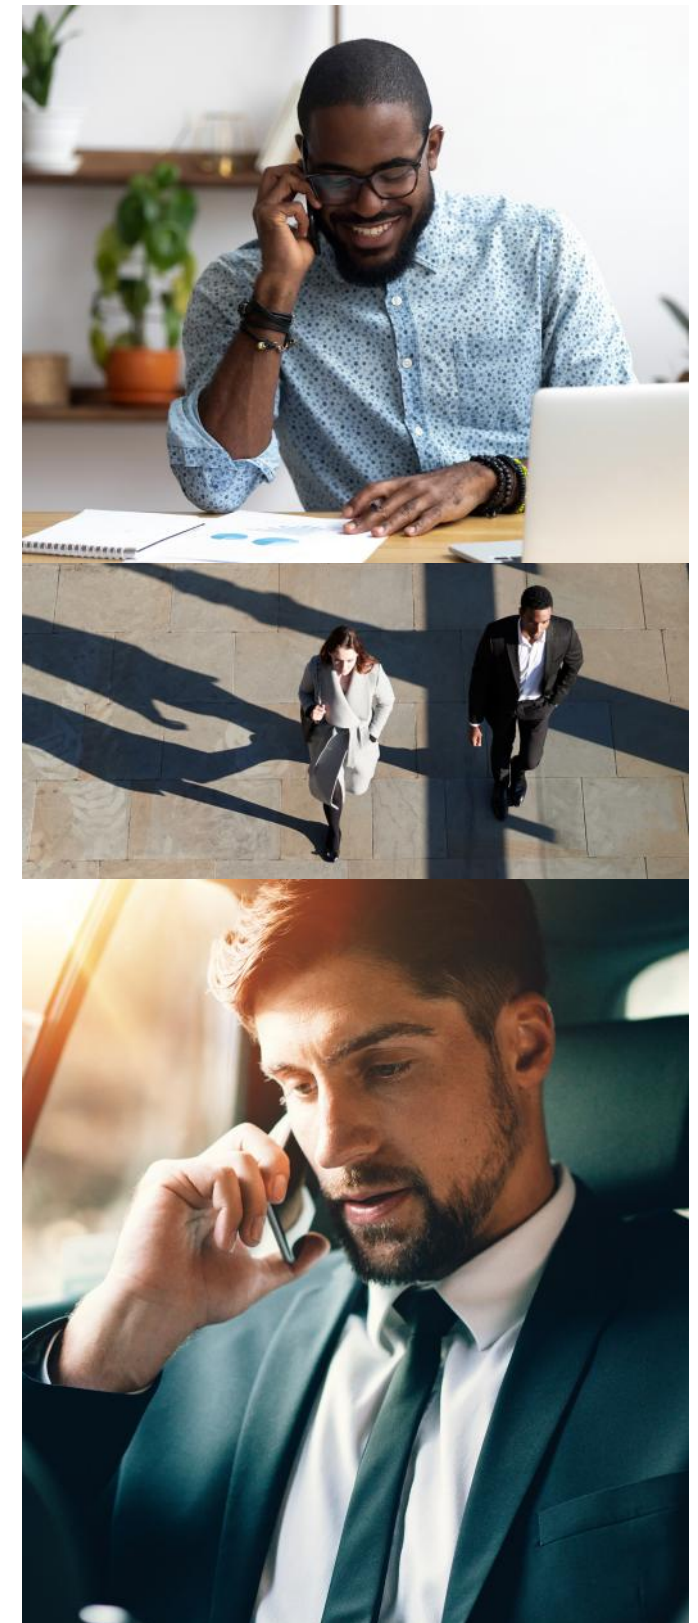

- We have all the control, so you have all the flexibility
- It's easier to manage your mobiles
- You can make adds and changes more quickly

Coverage

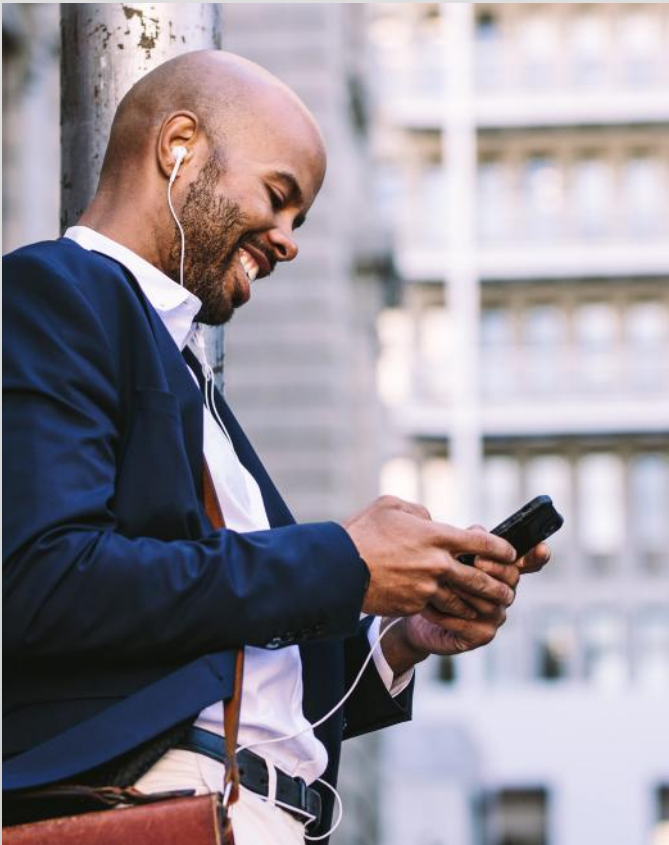

- Great population coverage: outdoor 99%, indoor 98%,
- 200+ roaming destinations

5G

- 5G access for faster data, lower latency, and greater device density
- With 5G you can handle 28x more data and we can deliver speeds over twice as fast as other UK mobile operators

What do you need from a business service?

Staying connected and sharing information

Being contactable and able to work as normal when you are mobile is key to doing business well, so having the best business mobile network possible is paramount. With access to the network built for data, working on the move won't be a problem.

Excellent customer service

We are committed to excellence in customer service and support, not only will you benefit from dedicated account management, but we also have UK based support teams offering 24/7 first line support.

Flexible working

Gamma Mobile lets you access everything you need to keep working no matter where you are. Our services support access to email, calendar, and tasks on the move as well as the internet and your company LAN.

A solution with business continuity built in

Unexpected events such as snow, floods, strike or roadworks need not disrupt business. Gamma Mobile can easily integrate with your fixed-line infrastructure to become the key form of communication in such an event.

Ability to travel for business

Gamma Mobile can help you control your expenditure when travelling overseas. We have a range of Business Traveller bolt-ons to suit your schedule, reducing the risk of bill shock and unexpected data charges.

Easy switching

Move from an existing provider efficiently thanks to a seamless transition process that allows you to take your existing numbers with you.

Improved staff productivity

With a device portfolio aligned to business requirements, tested for optimal network performance your staff will be just as ready on the move as they are in the office.

Keeping your data safe

By implementing a private APN your company can control and manage their mobile data in the same way as you can with your fixed data. This results in a more secure infrastructure, improved productivity and permits you to apply a coherent and consistent IT and data policy across both fixed and mobile devices.

Manage My Mobiles - Be more in control

Manage My Mobiles is a business portal which gives a you network level control over your mobile estate, enabling you to self-serve. You can also set up usage alerts and automatic capping to help monitor and control usage. This gives you a better control of your spending and helps to manage bill-shock.

Tariffs as flexible as your business

We appreciate that every business is unique with different needs. That's why we've created a series of flexible business mobile tariffs, and we can even put together something bespoke if needed.

Unlimited UK 01, 02, 03, 07 Calls and SMS

Perfect for customers looking for a fixed, predictable monthly cost.

PAYU Voice

For customers looking for flexibility and convenience. Perfect for those with low usage.

Data Only

Data only plans designed for tablets

Fixed access Fast Start and backup

Designed to enable fast deployment of fixed access services and backup.

Tariff Optimiser

Our simple value-added service provides built-in cost optimisation over your entire contract term.

- Tariffs flex with usage ensuring customers are always on the best tariff
- Value delivered every month for the entire contract
- Future-proof telecom spend and adapt to changing working patterns
- Concentrate on what you do best and leave managing mobile tariffs for your business fleet to us
- Service available to all estates regardless of size - with no minimum connection requirements

1

Select the tariff that meets your needs today.

2

We'll calculate your bill at our best rate, dependent on usage.

3

Any savings as a result of optimising the tariff are passed back to you.

4

That's it. We will send you updates on your saving success.
